

Modine proudly manufactures Building HVAC products that are Designed, Engineered & Assembled in the USA!

We deliver exceptional-quality products to our customers through continual improvement of every process. It's a full life-cycle approach; from conception and design, to manufacturing, all the way to installation and operation, we strive to provide an outstanding customer experience.

Our products can be found improving the air in classrooms so students can perform at their best, creating the ideal temperature environments to grow plants while using fewer natural resources, introducing fresh conditioned air to provide ventilation for IAQ; our purpose-based solutions make cleaner, healthier air accessible to the world. And we do it all right here in the United States.

Racine, WI Headquartered in Racine, WI since its founding in 1916, the Building HVAC Group produces heating, cooling and ventilation equipment.

Buena Vista, VA and West Kingston, RI Products made at these facilities consist of: gas fired, electric, oil fired and steam unit heaters, duct furnaces, make-up air units, mini-splits, radiation, and classroom horizontal and vertical unit ventilators.
